

Building a smarter deposit return system together

Bags for Deposit return systems (DRS)

Proven in Norway

Smart Supply supplies collection bags for Norway's deposit return scheme through Infinitum.

Efficient collection bags

Reliable performance.

Low cost.

Sustainable and resource-efficient.

INFINITUM

Norway: Leading the world in bottle and can recycling

93% of all bottles and cans sold are returned through reverse vending machines. When including other return streams, 98% are collected.

Norway introduced its first deposit system in 1902, today owned by *Infinitum AS*.

Decades of development have shaped today's efficient collection system and bags.

"If deposit was a world cup, Norway would be the reigning champion for the last 50 years."

About Smart Supply

We are the **sole supplier** of collection bags to Norway's deposit return system and also serve internationally.

Our packaging experience spans many years, from small fruit bags to big collection bags.

“We have many years of experience in packaging, covering everything from small fruit bags to large collection bags.»

Our **sustainability** work drives smart, cost-effective packaging solutions.

We produce a broad range of packaging with leading manufacturing partners **worldwide**.

+

Infinitum operates Norway's deposit return system.

Grocery stores buy or rent reverse vending machines from TOMRA and RVM Systems.

Smart Supply manufactures, stocks and distributes bags and accessories for **every type of deposit collection point across Norway**

Different channels use different solutions, depending on volume, type and packaging

Collection points

Grocery stores

Pallet bag

High volume collection through reverse vending machines.

Bars and venues

Keg bag

For empty kegs

Households

E-commerce bag

For household returns collected by the online retailer.

Other

Manual bag

Businesses, events & organizations without a reverse vending machine.

Europallet bags

Deposit collection bags for cans and PET bottles returned through and compacted by the reverse vending machine.

1/1 Europallet

For stores with high bag usage and sufficient storage space.

1/2 Europallet

For stores with lower bag usage or limited storage space.

Not just a bag

Transporting value requires traceability at every step

- + **Each bag is uniquely identified** with a barcode or QR code, can also include an RFID tag.
- + **Secure and efficient registration and tracking**, with easy scanning using a smartphone.
- + **Quality-assured and sustainable solutions**, optimized for distribution and recycling at a low cost.
- + **Reliable supply** with the capacity to handle large volumes.

Optimised from bag to Europallet

Years of research and development have refined every detail of our collection bags, from material use to logistics.

- + Strong, lightweight bags with less material, reliable performance at a competitive price.
- + Compact folding and efficient packing fit more bags in every box and on every pallet.
- + Less space needed. Lower storage and transport costs.

Flexible logistics

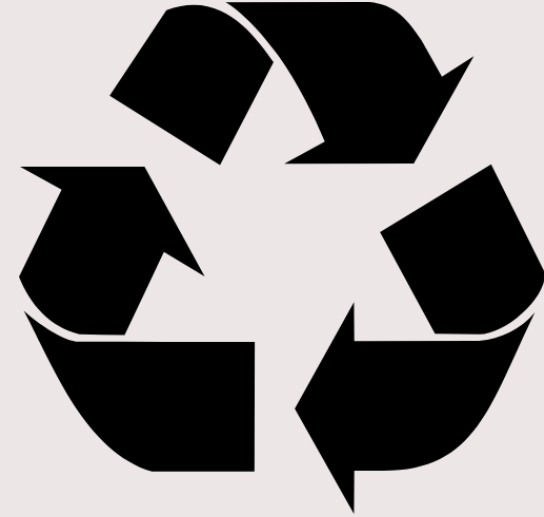

Flexible distribution solutions tailored to each market and customer

Environment and Sustainability

We take practical steps to reduce our environmental footprint across the value chain.

- + Sustainability is a core part of Smart Supply, and our work in this area has been recognised in Norway.
- + We are actively working towards the UN Sustainable Development Goals
- + We comply with the requirements of the EU Packaging and Packaging Waste Regulation (PPWR).
