RABTROLLEYS-TROLLEYS FOR ENVIRONMENT

Rabtrolley is the world's only manufacturer of shopping trolleys made from 100% recycled plastic. This is the result of many years of research and testing of different materials and components, which has created trolleys that are long-lasting and have mechanical properties like those made from new plastic.

Rabtrolley is concrete proof of how the circular economy can be realised. By using Rabtrolley products we are helping our environment to reduce plastic waste.

Trolleys for environment - three types of plastic

EKOBLACK

Regranulate is sourced from waste from our internal production and other industrial sources. The trolleys in this series are produced in black

EKOCOLOR

These are trolleys produced from reglanulate sourced from external suppliers. Customers can choose from 8 colours as standard and any other on special order.

SAVE the SEA

For this line, we use recycled plastic from waste fished from the seas and oceans. Our partner on that project is the Norwegian supplier Oceanize. Due to the specific nature of the reglanulate obtained in this way, the trolleys and baskets are graphite-coloured.

twin2t
WE CAN SAVE THE SEA

Combination of two ideas

- reducing the production of new plastic as much as possible
- maximum protection of the water environment by generating opportunities for the reuse of waste extracted from the seas.

A very concrete and clear way to save the sea. Project developed in collaboration with the Norwegian company Oceanize.
The idea was born from the concept of reducing the introduction of new plastics into the environment. The result of our work was TWINST BAG. A revolutionary tool for shopping with your own bags.
In order to make the offer within the project complete and protect the water ecosystem even more, we launched TWINST BASKET. At this moment we are also using the material from our supplier Oceanize to produce: MINI, Samba and Panaro.

SAVE THE SEA PROJECT- FROM IDEA TO COOPERATION

RABTROLLEY WERE BROUGHT TOGETHER WITH OCEANIZE BY THE COMMON IDEA OF CLEANING UP THE SEAS AND OCEANS. WE CREATED TWINST BASKET, FOLLOWED BY PANARO, MINI AND SAMBA, BASED ON THE RAW MATERIAL OBTAINED FROM MARINE WASTE. THIS REQUIRED THE COOPERATION OF EXPERTS FROM BOTH SIDES, AS WE WANTED TO ACHIEVE THE HIGHEST POSSIBLE PROPORTION OF 'SAVE THE SEA' MATERIAL IN THE FINAL PRODUCT. IN THE END, THE PARAMETERS DEVELOPED ALLOW US TO USE 100% RECYCLED MATERIAL, INCLUDING 70% FROM MARINE WASTE.

OCEANIZE IS A CENTRE THAT ENABLES CLOSED-LOOP CIRCULATION. IT WORKS STRONGLY WITH ALL PARTICIPANTS IN THE CYCLE: CONSUMERS, PRODUCERS, WASTE OWNERS.
OCEANIZE OFFERS TRANSPARENT PROCESSING OF PLASTIC WASTE IN NORWAY, FOR A CLOSED LOOP, FOR SUSTAINABLE RESOURCE MANAGEMENT.

SAVE THE SEA - TWINST FOR ALL

THE RABTROLLEY TEAM CONTINUES TO WORK ON IMPROVING THE PROJECTS ALREADY IMPLEMENTED. WE CREATIVELY LOOK FOR NEW SOLUTIONS. WE TAKE INTO ACCOUNT THE SPECIFICS OF THE LOCAL MARKET AND ADAPT TO SPECIFIC NEEDS EACH TIME.

TWINST BAG for ALL -

The idea of a "barrier-free shop" is not just a slogan for us. The project was inaugurated in 2022. A specially designed model Twinst bag. Lower than standard and with two additional arms to attach the frame to the consumer's wheelchair.

SAVE THE SEA - CUSTOMER EXPIRIENCE

"GO INTO A SHOP, DO YOUR SHOPPING AND LEAVE WITHOUT QUEUING". THIS IS WHAT SCAN&GO SYSTEMS OFFER. RABTROLLEY COMPLETES THE SYSTEM WITH THE PERFECT TROLLEY WITH HOLDERS FOR THEIR OWN BAGS, A SCAN HOLDER, OR A SMARTPHONE HOLDER.
THE CUSTOMER BECOMES PART OF A HEALTHY ECOSYSTEM. YOU DO NOT INTRODUCE NEW PLASTIC BAGS INTO THE ENVIRONMENT

TROLLEYS FOR ENVIRONMENT

Rabtrolley® Trolleys for the Environment

SINCE 2022, WE HAVE RECOVERED MORE THAN 700 TONNES OF PLASTIC FROM THE ENVIRONMENT

MODEL OF TROLLEY	PW in kg / trolley	EKOBLACK 100% post-industrial recycled plastic	EKOCOLOR 100% recycled plastic	SAVE the SEA 100% recycled plastic with 70% from the sea cleaning
 PANARO 55L	1,8 KG	✓	✓	✓
 BASKET twin2t® 86L	5 KG	✓		✓
 mini® 80L mini® 90L	6,8 KG 8 KG	✓	✓	✓
 samba® 130L	7,6 KG	✓	✓	✓
 MIDI 160L MAXI 210L	10 KG	✓	✓	

*PW = plastic waste (recycled plastic) in kilograms used per 1 trolley

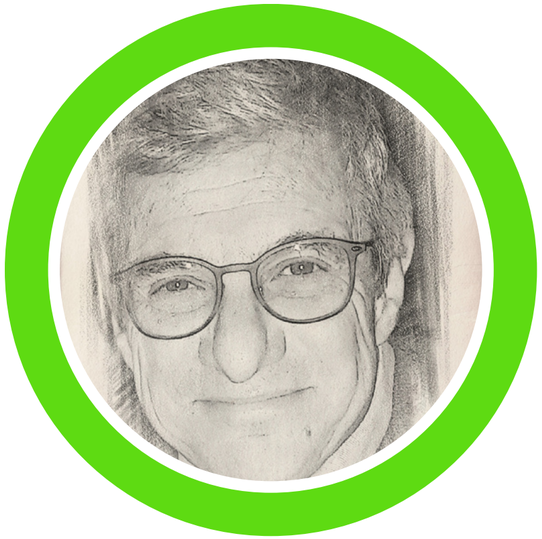

We have become the absolute eco-leader of the market.

Trolleys are made from 100% recycled plastic (the excluding parts and models in polycarbonate).
