System 50 Main Elements

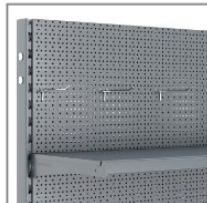

Upright

is the main supporting element of the rack. Designed with three cross section options for different loading. Various heights are available, starting from 1100 mm to 3000 mm. The symmetry of the upright facilitates the installation process.

Perforated back panel

euro-perforation allows the usage of different accessories.

Baseleg

can be assembled with upright without using additional elements. Has two adjustable feet. Bumper and plinth installation is possible.

Standard back panel

A section of a shelving system has 4 options for height and width

Bracket

Cross-functional, can be installed at different angles. Brackets Length:

- from 200 mm to 470 mm, angles 0°, 20°, 35°
- from 470 mm to 770 mm, angles 0°, 10°, 20°.

Shelf

has 4 standard widths and 8 depth options. U-shaped profiles on the front and back sides facilitate installation of price holders, barriers, dividers.
